Sustanon 250 (Testosterone mix)

Dosage

For therapeutic purposes, the drug is used at 250 mg per every third week of the course. For athletes, a dosage of 250 to 750 mg in 7 days is recommended. Usually the dose is taken in two divided doses. The course of admission lasts from 4 to 8 weeks. According to statistics, this is enough to gain muscle mass and increase strength characteristics.

Side effects

Negative effects of the drug are expressed differently and depend on the duration and amount of use. Also important is the genetic predisposition. Anyway, with an overdose you can expect:

- acne (acne);
- hair loss, up to baldness;
- irritability;
- strong attraction to the other sex;
- decrease in the secretion of androgenic testosterone;
- accumulation of fluids in the body;
- development of gynecomastia.

Reception effects

- rapid muscle building;
- stimulation of blood circulation;
- increase in strength;
- increased sexual desire;

Many athletes note that the effect of using Sustanon is achieved as soon as possible.
