

GUARD 'N SPRAY® INSTRUCTIONS

Instructions for Use:

Shake well before use.

Guard 'n Spray is an effective method for treating and controlling plant pests and fungal diseases such as spider mites, broad mites, aphids, fungus gnats, white flies, beetles, thrips, powdery mildew, and downy mildew.

Spray directly on visible pests and all parts of the plant including the undersides of leaves and all node points. Multiple applications may be required for infestation control.

Spray in early morning or early evening for best results. Avoid spraying in temperatures over 90° F or intense sunlight. In mild lighting conditions, Guard n Spray is safe for use.

Recommended for use during the vegetative stage. Not recommended for use during mid to late flowering stages for high-value or oil crops.

Safe for use on organic food crops, and usable up until harvest.

No Re-Entry period is needed between Guard 'N Spray applications

Application	Dilution Rate*	Frequency
Prevention	15-20ml	daily, up to 3 times max
Infestation	25-30ml	daily, up to 3 times max
Soil-Borne	15-30ml/gallon	once daily

*all rates are per gallon of water.
