Solid Start® provides plants with nitrogen and potassium to promote growth in a plant's vegetative phase. For use in soil, coco, and all hydroponic mediums.

For Best Results:

- · Base A and Base B form the foundation of the Growth Science® nutrient regimen. Along with these base nutrients, use Solid Start® in the vegetative stage and Rock Solid® in the flowering stage in order to deliver the proper NPK ratio to the plant. Refer to the feeding chart below for mixing recommendations.
- Adjust the pH of the final mix to between 5.5 and 6.5.
- · Reverse osmosis water is recommended.
